

# Carbon Steel / Stainless Steel Rotary Valve Grains Separating And Discharging Use

## **Basic Information**

- Place of Origin:
- Brand Name: OEM
- Certification:
- Model Number:
- Minimum Order Quantity:
- Price: Negotiable
- Packaging Details: Plywood Cases
- Delivery Time: 15-60 Days
- Payment Terms: L/C, T/T
- Supply Ability: Based On Order

## **Product Specification**

• Flange:	Upper And Below Round
• Flange Size:	250
• Volume:	14L
• Material:	Carbon Steel Or Stainless Steel Or Other Materials
Transport Of Materials:	Grains
• Drive:	Direct
<ul> <li>Work Temperature:</li> </ul>	Original
<ul> <li>Work Pressure:</li> </ul>	Original
<ul> <li>Highlight:</li> </ul>	square flange valve

Our Product Introduction

### **Product Description**

#### **Rotary Feeder Valve**

#### How do we ensure finished product quality (FQC inspection)

- 1. Visual Inspection
- 2. Material Grade Measurement
- 3. Dimension Inspection
- 4. Roughness Detection
- 5. Roughness Detection
- 6. Leakage Test

#### Surface Treatment

We offer the following processes to choose:

- 1. Mechanical Polishing (MP) to improve brightness (gloss, matte)
- 2. Acid Cleaning for Anti-corrosion
- 3. Electrolysis Polish (EP) to improve surface smoothness
- 4. Custom Process: Bright Annealing treatment eliminate strees to improve toughness

#### Rotary valve is often used in grains.

Rotary valve is applied to discharge powder or granular material either in positive air pressure or in negative air pressure of pneumatic conveying system. Also it is a necessary device for ventilation and move dust systems. Rotary valve is especially suitable for separating and discharging powder and small particulate matter in the process of positive and negative suction. Rotary airlock feeders have wide application in industry wherever dry free-flowing powers, granules, crystals, or pellets are used. Rotary valve is primarily used for dischang of bulk soild material from hoppers/bins, receivers, and cyclones into a pressure or vacuum-driven pneumatic conveying system. Components of a rotary valve include a rotor shaft, housing, end plate, and packing seals and bearings.

**Our company** is specialist in design and production of high quality water valve, and has grown to become one of the leading manufacturers for fluid control valve. We design and manufacture a wide range of fluid valve,, such as float control valve, trunnion ball valve, water pressure reducing valve, rotary airlock valve, sanitary butterfly valve, hydraulic check valve, sewage air release valve, etc. Our constant technical innovation combined with stringent quality control systems has enabled us to deliver high performance and outstanding value in industrial applications.

Pressure Range       2bar system and differential pressure         Work temperature       -20 ~200         Main Size       DN100mm~1200mm(4"~48")         Flange Standard       PN10/ANSI150lbs/JIS/GB/HG/SH or customised         Drive Mode       Direct Drive with OSHA Guard         Capacity       100KG~150000KG/H         Application Medium       Powder and granular form         Rotor       Adjust blades scalloped rotor         Shaft Sealing       Gland Packing, or AirPuge seals		Main parameters and option
Main Size         DN100mm~1200mm(4"~48")           Flange Standard         PN10/ANSI150lbs/JIS/GB/HG/SH or customised           Drive Mode         Direct Drive with OSHA Guard           Capacity         100KG~150000KG/H           Application Medium         Powder and granular form           Rotor         Adjust blades         scalloped rotor	Pressure Range	2bar system and differential pressure
Flange Standard         PN10/ANSI150lbs/JIS/GB/HG/SH or customised           Drive Mode         Direct Drive with OSHA Guard           Capacity         100KG~150000KG/H           Application Medium         Powder and granular form           Rotor         Adjust blades         scalloped rotor	Work temperature	-20 ~200
Drive Mode         Direct Drive with OSHA Guard           Capacity         100KG~150000KG/H           Application Medium         Powder and granular form           Rotor         Adjust blades         scalloped rotor	Main Size	DN100mm~1200mm(4"~48")
Capacity         100KG~150000KG/H           Application Medium         Powder and granular form           Rotor         Adjust blades         scalloped rotor	Flange Standard	PN10/ANSI150lbs/JIS/GB/HG/SH or customised
Application Medium         Powder and granular form           Rotor         Adjust blades         scalloped rotor	Drive Mode	Direct Drive with OSHA Guard
Rotor Adjust blades scalloped rotor	Capacity	100KG~150000KG/H
	Application Medium	Powder and granular form
Shaft Sealing Gland Packing or AirPuge seals	Rotor	Adjust blades scalloped rotor
Giand Facking of Air uge seals	Shaft Sealing	Gland Packing or AirPuge seals
Else Vent opening	Else	Vent opening

#### **Technical Parameters**

		Installation Dimension RPM						Motor	Main hat				
Mod el	ØA	ØВ	øc	н	Q	L	М	N	n-Ø	Working temperature	(rpm/min )	power (KW)	Weight (KG)
2L	100	160	190	250	8	720			6-Ø13			0.55	80
4L	150	220	250	300	8	780	600	560	8-Ø13	Inboard bearings≤80 Outboard bearings≤300	3~33	0.55	100
8L	200	280	320	350	10	820	650	600	8-Ø18			0.75	120
