

Direct Driven Rotary Pneumatic Valve Lime Powder Separating And Discharging Use

Basic Information

Place of Origin: China
Brand Name: OEM
Certification: CE & 900
Model Number: ZRO
Minimum Order Quantity: 1

Price: Negotiable
Packaging Details: Plywood Cases
Delivery Time: 15-60 Days
Payment Terms: L/C, T/T

Supply Ability: Based On Order

Product Specification

• Flange: Upper And Below Round

Flange Size: 500Volume: 90L

Material: Carbon Steel Or Stainless Steel Or Other

Materials

Transport Of Materials: Lime Powder
 Drive: Direct
 Work Pressure: Original

• Highlight: square flange valve

Product Description

Upper and lower round flanges, positive or negative pressure conveying rotary valve , rotary airlock feeder

Surface Treatment

We offer the following processes to choose:

- 1. Mechanical Polishing (MP) to improve brightness (gloss, matte)
- 2. Acid Cleaning for Anti-corrosion
- 3. Electrolysis Polish (EP) to improve surface smoothness
- 4. Custom Process: Bright Annealing treatment eliminate strees to improve toughness

Forming Machine Process

- 1. CNC Lathe Processing
- 2. High precision CNC machining center processing
- 3. General lathe processing
- 4. The machine punch the product parts
- 5. Cold Forming Molding
- 6. Welding Assembly

Rotary valve is often used in lime powder.

Rotary valve is applied to discharge powder or granular material either in positive air pressure or in negative air pressure of pneumatic conveying system. Also it is a necessary device for ventilation and move dust systems. Rotary valve is especially suitable for separating and discharging powder and small particulate matter in the process of positive and negative suction. Rotary valve is primarily used for dischang of bulk soild material from hoppers/bins, receivers, and cyclones into a pressure or vacuum-driven pneumatic conveying system. Components of a rotary valve include a rotor shaft, housing, end plate, and packing seals and bearings. Rotors have large vanes cast or welded on and are typically driven by small internal combusyion enginesor electric motors.

Main parameters and option
