

Basic Information

. Place of Origin: China . Brand Name: OEM CE & 900 · Certification: ZRO Model Number: • Minimum Order Quantity:

• Price: Negotiable Packaging Details: Plywood Cases • Delivery Time: 15-60 Days Payment Terms: L/C, T/T

Based On Order . Supply Ability:

Product Specification

• Flange: Upper And Below Round

• Flange Size: 350 35L . Volume:

• Material: Carbon Steel Or Stainless Steel Or Other

• Transport Of Materials: Sesame Powder

Drive: Direct Work Temperature: Original • Work Pressure: Original

Highlight: direct drive rotary valve

Product Description

Rotary Feeder Valve

Main parameters and option

| 2bar system and differential pressure |
|--|
| -20 ~200 |
| DN100mm~1200mm(4"~48") |
| PN10/ANSI150lbs/JIS/GB/HG/SH or customised |
| Direct Drive with OSHA Guard |
| 100KG~150000KG/H |
| Powder and granular form |
| Adjust blades scalloped rotor |
| Gland Packing or AirPuge seals |
| Vent opening |
| |

*Note: If match special flange, please let us know before production.

Rotary valve is often used in Sesame powder.

Rotary valve is applied to discharge powder or granular material either in positive air pressure or in negative air pressure of pneumatic conveying system. Also it is a necessary device for ventilation and move dust systems. Rotary valve is especially suitable for separating and discharging powder and small particulate matter in the process of positive and negative suction.

Rotary valve is primarily used for dischang of bulk soild material from hoppers/bins, receivers, and cyclones into a pressure or vacuum-driven pneumatic conveying system. Components of a rotary valve include a rotor shaft, housing, end plate, and packing seals and bearings. Rotors have large vanes cast or welded on and are typically driven by small internal combusyion enginesor electric motors.
